

Institutional Research Overview

Overview

Imperial Capital's research is differentiated by its integrated approach across an issuer's entire capital structure. In contrast to the traditional fixed income and equity model, our emphasis is on relative values throughout the capital structure within industries where we have deep expertise. We provide proprietary investment analyses in fixed income, convertibles and busted convertibles, equity and preferred stock including:

- Bank Debt
- Investment Grade Debt
- High Yield Debt
- Distressed Debt
- Convertible Securities
- Preferred Stock
- Common Stock
- Litigation, Trade, and Liquidation Claims

We have extensive experience understanding complex capital structures and special situations such as bankruptcies and restructurings. We deliver our research and analysis to clients timely. In addition to providing recommendations on specific securities and event driven opportunities we also provide valuable insight into important industry trends. We accomplish this through three distinct research operations: Capital Structure Analysis, Desk Analysis and Industry Analysis.

Capital Structure Analysis Group

Taking a holistic view of the capital structure better enables Imperial Capital's seasoned analyst team to identify opportunities and inefficiently priced securities across the market. The group leaders have significant experience in asset management and the group, as a whole, takes a buy-side approach in identifying investment opportunities in typically out-of-favor or off-the-run situations that often are overlooked or misunderstood by the market. The Capital Structure Analysis Group publishes research on companies within several industries including: airlines, aerospace/defense, autos and auto suppliers, building materials, chemicals, consumer, gaming and lodging, financial services, food processing, general industrial, healthcare, independent power producers, metals/mining, packaging, paper and forest products, retail, restaurants and technology.

Desk Analysis Group

Our desk analysts are focused on timely identification of event-driven and/or capital structure opportunities. We have significant expertise in bankruptcy and legal-process driven situations. Our targeted research on special situations includes research on bank debt, trade claims and post-reorganization equities.

Desk Analysis Notes

- Bank Debt Notes
 - Bankruptcy Trading Notes
 - Liquidation Analysis
 - Desk Trading Notes
 - Proprietary Analysis in Select Special Situations
-

Capital Structure Analysts – Desk Analysis Group

- Kurt M. Hoffman
- Brad Bryan
- Matt Kaplan
- Daniel Osowsky

Industry Analysis Group

Our Industry Analysis Group provides macroeconomic insight in key industries as well as company specific coverage within these industry groups. We leverage the expertise of our industry professionals to provide innovative and proprietary investment ideas to our institutional clients. The Industry Analysis Group issues Industry Monitor publications which provides insight into important industry sector trends as well as capital markets and merger and acquisitions activity.

In addition to the macroeconomic Industry Monitor publications, the industry analysts provide equity research coverage on companies within targeted industries. Our analysts develop in-depth and relative-value analysis with a focus on middle market companies, typically ranging from \$100 million to \$2 billion in market capitalization. Our dedicated focus in the middle market combined with our valuable industry expertise enables us to bring unique investment insight to our clients.
